No. 1732

MYSORE P. W. DEPARTMENT.

CENTRAL OFFICE,

Bangalore.....14th February.....*191* 7.

From Rajasabhabhushana

KARPUR SHRINIVASRAO, ESQ., B.SC., L.C.E., M.R.A.S.,

Chief Engineer of Mysore,

Bangalore.

To

The Deputy Commissioner,

Hassan District, H a s s a n.

Sir,

With reference to your letter No.R.C.563 of 16-17/Mis dated the 5th February 1917 I have the honour to forward for your information, a statement showing the progress made on the subjects relating to the Public Works Department in the notes of the Dewan's tour in the Hassan District during the month of April 1916 for the half-year ended 31st December 1916.

2. The information on the marginally noted items has not been furnished by the Executive Engineer Hassan Division, that officer has been requested to expedite his report on them.

1. Survey of Major and Minor tanks.
2. Formation and working of Tank Panchayets
3. Improvement to Sri Ramadevar Dam.
4. Increasing the irrigation below the North channel from Sri Ramadevar dam by the help regulation of hot weather supply.

3. A copy of the report on the maintenance of the sculptural work on the outer walls of the temple at Halibid received from

Sd. R.V.Sundramier,
for Chief Engineer of Mysore.

GEN. & REV. SECRETARIAT. V
GENERAL
26 FEB. 1917

No. 1734 Enc. 2 Dated Bangalore, 15/2 February 1917.

D. 6098. Jan 16.10

Copy of the above (with copy of the Statement and the Executive Engineer's No.41 of the 25th January 1917) is forwarded with compliments to the Secretary to Government, General Department, for information, in continuation of this office No.219 of the 9th January 1917.

RSV over 26/2/17
J.R.

R V Sundramier
for Chief Engineer of Mysore.

Letter No.41 dated 25th January 1917 from the Executive Engineer, Hassan Division, to the Chief Engineer of Mysore, Bangalore.

Your No.218 dated 9th January 1917 requesting to report the approximate recurring charges every year to carry out the measures recommended for protecting the sculptural work on the outer walls of the temples at Halebid and Belur &c.

With reference to the above I have the honour to state that there are watchmen employed for looking after the safety of the work for all these temples. No further establishment appears necessary. A lump sum of about Rs.50/- per year may be required for the purchase and use of scrub eradictor and stone preserving oils. This amount will be tried for a year and whether it is sufficient or not reported afterwards. I shall make a more careful examination of the condition of the sculptural work in these temples next month.

On the rapidity of growth of plants and the efficiency of the eradictor will depend the quantity of the latter which will be required.

It is only by watching the work for some length of time that any approximate estimate of requirements could be made. I therefore request that some more time be given to me for watching the process of deterioration, if any, of the sculptural work before I could give even an approximate cost recurring charges.

To replace broken parts of figures, no provision appears necessary as many will be of opinion that these figures are better kept in their mutilated conditions than that they should be replaced by carves who could not catch the spirit or have

anything like a small fraction of the ability, ~~xx~~ of the architects who executed the carvings.
